

Driving digital transformation

AVEVA creates software that enables people to engineer, operate and maintain complex industrial assets safely, efficiently and cost-effectively. Our software transforms opportunities into business value across diverse markets, particularly for the process, batch and hybrid industries. Our broad portfolio of software solutions spans the entire operational life cycle of many of the world's major industries.

Operational Excellence

Subscription Transition

Digitalisation of the industrial world

Values and purpose

AVEVA is committed to being a leader in industrial software for a sustainable future, working with our employees, our customers, our partners and the wider communities where we do business. We aspire to a world where economic growth supports environmental sustainability, with better living standards for the communities where we and our customers operate.

Financial performance in the year to 31 March 2020
